

# A Sustainable Approach to Skincare

---

Certified Organic USDA (NOP) and OCIA

Seafloreskincare is certified organic to food grade levels by the Organic Crop Improvement Association (OCIA) and is approved by the United States Department of Agriculture (USDA) under the National Organic Program (NOP). Seafloreskincare is perfect for those committed to an organic lifestyle and looking for a natural means to nourish, soothe and restore their skin.

It has been determined by the scientific community that over 60 percent of all ingredients that we are regularly exposed to or apply on our skin are absorbed directly into our bloodstream.

This is why it is vital to feed your body and skin with ingredients that are whole, raw, certified organic, healthy and nutritious and contain no contaminants or toxins.

Each year we have our seaweeds and ocean water rigorously tested to ensure the highest quality seaweed skincare in the world.

Seafloreskincare is committed to providing skincare free of the following toxic industry ingredients:

- Insecticides, herbicides or fungicides
- Fertilizers or genetically modified ingredients
- Free of artificial colors and fragrances
- Dioxins
- Petrochemicals
- Sodium lauryl sulfate
- Sodium laureth sulfate
- Mineral oils
- Parabens
- Imidazolidinyl Urea
- Propylene Glycol
- Hexane
- Pthalates
- Aluminum
