

# BODY SUGARING

**NO OIL, NO RESIN!** Ancient method used in countries of the Maghreb and the Middle East consisting of hair removal with sugar, honey, lemon juice and water. Body sugaring is completely natural and contains no chemical additives. Recognized for its exfoliating action, it leaves skin soft and silky. Since hair is removed in the same direction it grows, the root is redressed and the deformation of the hair follicle is avoided favoring the inhibition of ingrown hairs. Recommended for all skin types, and all areas without restriction, it is used for both female and male hair removal. It's a very ancient method, very gentle and responds to ever-increasing customer demands. Training is a must for all beginners.

**NO STRIPS REQUIRED**

SOLUTIONS  
ÉPILATOIRES  
AVANCÉES

**CHARACTERISTICS :**

- 100% natural and water soluble
- Is used at room temperature (cold wax)
- Appropriate for all skin types, recommended even for the most sensitive. Recommended to people which are less resistant to pain or suffering from leg pain, even for teenagers
- Important decrease in redness after hair removal

**ADVANTAGES :**

- Excellent exfoliating action to eliminate dead cells
- Hair grows slower
- Hair become more silky, more supple, finer
- Less ingrown hairs

**Preparing for body sugaring**

1. Remove plastic safety seal and remove cover.
2. Container must be heated in microwave: From 5 to 10 seconds until the perfect malleable paste. **Attention do not overheat, hot sugar is very hot on the skin.**
3. Use NITRILE gloves to facilitate the application and to always guarantee hygienic contact with the skin
4. Do not replace used sugar in the original container, dispose of it and restart operation with a new batch if needed. Do not forget to change your gloves if this step is needed.
5. It is recommended to cover the Boléro and stock it in a dry and fresh environment until the next session.
6. Always avoid stocking container in places where humidity and heat are present.

**SUGAR TYPES**

There are 5 different compositions, choose according to heat released by aesthetician's hands.

HAND WARMTH	TYPE
 EXTRA COLD	EXTRA-SOFT
 VERY COLD	SOFT
 COLD	SUPPLE
 NORMAL	REGULAR
 WARM	HARD

**Softening temperature**

**Texture :** Malleable paste

**Ingredients :** Sugar, Water (Aqua), Lemon juice (Lemon suci)

**Special touch :** 100% Natural

**Remark :** Totally edible (Before hair removal)

**Suggested application \***

Skin type	Hair type	Regions
All	All	All

*\* This application is for information purposes as the data and/or comments do apply according to the place, technique and temperature of the sugar during the treatment. Our suggestions are based on comments received from our customers and itemized along the years.*

**All our body sugaring is made for all skin areas and hair types.**

**Directions for use:**

1. Sanitize area with Épillyss Pre-Depilatory Lotion
2. Take a small quantity of sugar paste in your fingers, equivalent to a tablespoon and by stretching it, give it the perfect consistency
3. Once this operation done, gather this sugar ball in your fingertips using your predominant hand.
4. Spread a thin layer of paste with your fingertips (distal phalanges or also with intermediate phalanges) on the area to be treated of about 10-15 cm long and 2-5 cm wide.
5. Proceed three times in the OPPOSITE direction of hair growth
6. Maintain skin stretched with your free hand. Ask for your customer's assistance to stretch skin if needed.
7. Without waiting and without removing fingers pull with a quick movement in the same direction as hair growth parallel to the skin so as not to cause bruising
8. Sugar paste must remain soft and the technician should not feel any resistance on the skin.
9. Remake your sugar ball paste and continue procedure.
10. You may use the same sugar ball until complete saturation (with hair).
11. If skin becomes too damp for hair removal, use a tissue to absorb moisture before applying your sugar paste. The very light use of a natural talc is acceptable but not recommended.
12. Once waxing session completed, apply Épillyss post-depilatory Gel to reduce redness.
13. Afterwards, perform light massage using an Épillyss Post-depilatory soothing and moisturizing product of your choice.
14. You can clean your work area (instruments, table and other) with water and sanitizing product.
15. Please note. This technique is not recommended on yourself since some movements are not easily completed

**Warning**

Avoid exposure to the sun or tanning beds before and/or after any epilation session. Skin sensitivity is enhanced by UV-rays and is therefore more subject to burns. If your customer is preparing for a special event, schedule the hair removal session the day before. Never practice epilation on broken, burnt or irritated skin, on warts, moles, eyelashes or nipples. Depilation should not be done on people with diabetes or under medication without prior consent from their doctor. It's possible to see red spots on the skin or feel tingling sensation following an epilation session. They disappear after a few hours. The use of the épillyss post-depilatory Aloe gel will reduce the reaction. If waxing for the first time, we suggest a small patch test to test for allergies and wait ten minutes before pursuing further. IF YOU OVERHEAT YOUR CONTAINER, WAIT a few minutes to allow the sugar to cool down to diminish the risk of burning yourself and your client's skin.
